

TouchAnalytics

DASHBOARDS MADE SIMPLE

Touch Analytics

- AppExchange Product.
- Wave Analytics Dashboard Templates.
- No JSON, just mouse clicks to create Interactive dashboards.

SCOPE

Customers who use wave analytics in salesforce has to create Dashboards using JSON. The avg time to create a basic dashboard is more than 20-30 hours which is difficult to spend for medium level business.

CHALLENGES

Main challenge to create certain functionality for creating automatic Dashboards in WaveAnalytics is the need of gaining in depth knowledge of JSON and automating the JSON creator with clicks is the biggest challenge for this Project.

SOLUTION

Solution we provided is to give customer the flexibility to build his own dashboards without developer or admin support automatically with just clicks. The customers can just select the required

- Dimensions
- Measures
- Dates
- Filters

and just submit to create dashboards and all these things customer can do in few minutes to generate good looking dashboards.

RESULTS

- Customer can now generate dashboards by himself automatically.
- Customer is saving Time & Money
- No JSON knowledge is needed.
- Updating the dashboards is now easy and quick.
